The European Green Deal

The European Green Deal ... More than Climate Neutrality

ENERO 30th Birthday, 1st June 2022, Brussels, Belgium

The European Green Deal

The European Green Deal – Key facts

- ▶ Green Deal = EU funding amounts of €1.8 trillion with at least 30% of which will go towards climate action.
- ▶ The cost of inaction on climate change far outweighs the costs of action.
- ▶ European Climate Pact will engage people, communities and organizations in climate action for building a greener Europe
- ▶ European 'Climate Law' will help implement the 2030 intermediate target and the 2050 climate neutrality objective into legislation
- ▶ Decarbonizing the EU's energy system is critical to limit global warming, but also prepare Europe to be resilient for the unavoidable impacts of climate change.
- ▶ Energy efficiency plans to develop a European power sector based largely on renewable sources (Hydrogen, Bio-Methane, Offshore Renewable Energy, European Battery Alliance ...)

ENERO 30th Birthday, 1st June 2022, Brussels, Belgium

The European Green Deal

The European Green Deal – Key facts

- ▶ Change the ways we consume and achieve zero waste (electronics and ICT, textiles, plastics, food and packaging ...).
- ▶ Reducing greenhouse gas emission from transport up to 90% in 2035 (EURO7 emissions standards, ICT testing)
- ▶ Creating 160,000 green jobs and reducing energy consumption to boost the European enterprises on a worldwide global market (low carbon industries, digital platforms, green raw materials ...)
- ▶ Improving quality of life and make Europe more inclusive for all citizens
- ▶ Provide healthy food produced with ecological technologies (Farm to fork strategy) and actions to preserve biodiversity
- ▶ Strengthening international partnerships, setting standards, and advocating for greater climate action worldwide.
